

Content Policy

Prohibited and flagged words, generated October 21, 2026

No content may suggest or depict illegal or non-consensual activity. This covers the content itself and its title, description, tags and categories, and it applies whatever words are used, so a title can break this rule without using any word below.

This policy is PaysiteManager's interpretation of Visa and Mastercard rules for adult websites, which our payment processors have to follow. It isn't the card networks' own wording and can change when their rules change. Full policy: support.paysitemanager.com/content-policy

The lists below are the words PaysiteManager checks when you save content. They are not a complete list: words with the same meaning, misspellings and spaced-out versions are not allowed either. The list is updated over time; download a fresh copy from the Content Policy page in your dashboard.

Banned words (431)

Not allowed in titles, descriptions, tags or categories. From November 2, 2026, content using certain banned words is disabled until the wording is changed; from December 1, 2026, it can't be saved.

***e	**pe	*ape	6teen

Warning words (79)

Content using these words can still be saved, but you'll see a warning. Billing processors may flag them during reviews, so use them only where the context is clearly legal and consensual.
